Allowable Subject Matter

1. Claims 1-14 are allowed.

The following is an examiner's statement for reasons for allowance.

2. Claim 1 is allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest sending a packet twice during one packet transmission time, setting each block of the data packet according to the report rate of the first data-transmitting unit and pressing the identification key to switch the system into a data-identifying status. It is noted that the closest prior art of record, Choi (USPUB 20020141375) shows transmitting packets via an assigned TDM time slot. However, Choi fails to suggest setting each block of the data packet according to the report rate of the first data-transmitting unit and pressing the identification key to switch the system into a data-identifying status.
3. Claim 14 is allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest setting the transmitting time of the first data packet and the first ID packet to be four times of the sum of the transmission time of the first data packet and the transmission time of the second data packet.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US PUB (20020041586) to Hayashino et al. discloses setting the number of times of packet transmission (figure 7, element s2).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hong Cho whose telephone number is 571-272-3087. The examiner can normally be reached on Mon-Fri during 7 am to 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
